B.Tech Computer Science & Engineering	8.34/10.0	2022–2026	VIT Bhopal University, MP

ACADEMIC PROJECTS

CodeGenie – AI-Powered Coding Assistant Python, LangGraph, Multi-Agent Systems July 2025 – Aug 2025

- Developed an AI-powered coding assistant that functions as a multi-agent development team, capable of transforming natural language requests into complete, working projects.
- Designed and implemented Planner, Architect, and Coder agents using LangGraph to simulate real-world developer workflows for project planning, task decomposition, and file-by-file code generation.
- Integrated Groq API for fast inference and built end-to-end automation to generate applications such as to-do lists, calculators, and blog APIs from user prompts.

FoodieBot FastAPI, MySQL, Dialogflow, HTML, CSS, JavaScript Jun 2025 – July 2025

- Built an AI-powered food ordering chatbot integrated into a restaurant website, handling 200+ test orders with under 2s response latency.
- Engineered a FastAPI backend to process Dialogflow intents, automate order tracking, and reduce manual order handling effort by 60%.
- Designed a normalized MySQL schema with stored procedures for price calculation and order tracking, ensuring 100% consistency in order data.
- Deployed chatbot on the website, enabling 24/7 automated order management and improving customer interaction efficiency.

Resume Builder React, Node.js, MongoDB, HTML, CSS, JavaScript Dec 2024 – Feb 2025

- Developed an interactive resume creation platform that guided 100+ users through a step-by-step process, reducing resume preparation time by 50%.
- Implemented dynamic resume template generation, enabling users to instantly create professional and customizable resumes in multiple formats (PDF/Word).
- Designed a responsive and intuitive UI, improving user engagement and increasing successful resume exports by 40%.

ACADEMIC ACHIEVEMENTS AND AWARDS

- Top 5 finalist out of 150+ teams in a college-level hackathon, solving real-world issues in 24 hours.
- Oracle Certified AI Foundations Associate - Recognized for expertise in AI foundations
- Solved 300+ DSA problems (LeetCode, GFG,)

POSITIONS OF RESPONSIBILITY

- Project Team Lead:** Garbage Detection Model – Led a team to develop a YOLO-based computer vision model for roadside garbage detection, improving waste classification accuracy and enabling automated monitoring.
- Core Committee Member:** In college fests, managed logistics for 1000+ attendees

TECHNICAL SKILLS

Languages:	C++, Python	Frontend:	React.js, Next.js, TailwindCSS
Backend:	Node.js, Express, REST APIs	Databases:	MySQL, MongoDB, Redis
Cloud/DevOps:	AWS (EC2, S3, RDS), Docker	Tools:	Git, DialogFlow

OTHER INFORMATION

- Languages:** Hindi (Native), English (Fluent)
- Interests:** System Design, Competitive Programming, Financial Markets, Innovation
